

Summer Math Skills Maintenance

Dear Parents,

Summer is nearly here - hooray! While we look forward to a summer of rest and relaxation, we want to ensure that our students do enough math review and practice to keep their skills sharp for the fall! Rather than assigning the same work to every student, we want to make sure there are options that will work for you and your child(ren), and we've provided a list of options below. So, instead of collecting math practice work next fall, we will be collecting a Math Practice Tracker (see reverse) from each student. Just like a summer reading challenge at the local library, the back of this sheet can be used to track progress. For each day that students spend 15-20 minutes doing math, parents should initial and date one of the 20 shapes. When we return to school, the completed sheet can be turned in for a special treat!

Required:

MULTIPLICATION TABLES MEMORIZATION! **ALL STUDENTS** IN OUTGOING GRADES 3 AND UP SHOULD HAVE THE 0-12 MULTIPLICATION TABLES *MEMORIZED* BY SEPTEMBER. THERE MAY BE A SCHOOLWIDE PRIZE SPECIFICALLY FOR THIS!!! Multiplication is *fundamental* to more advanced work in math.

Math Practice Options:

Students in outgoing grades K-7 will receive a hard copy math packet from their current math teacher to complete; this is their primary source for skill review.

For students who finish it and are ready for more – here are some ideas and sources for math practice for all students:

- Flashcards (either printed or online)
- Games (board games and online)
- Review math books - pick one up from Target or even the grocery store!
- Free printable worksheets:
 - a. Math-Aids.com – answers included
 - b. math-drills.com – answers included
 - c. Webmathminute.com
- Online instruction and practice
 - a. Khan Academy – free
 - b. Khan Academy Kids – free app with no ads; for children ages 2-8
 - c. IXL (\$13-\$20 monthly subscription) – targeted concepts
- Games (A search will yield many results. Here's a small sample.)
 - a. MathPlayground.com – developed by a teacher; free
 - b. PuzzlePlayground.com – developed by a teacher; free
 - c. Primary Games. Math Flashcards – free
 - d. BuzzMath - free 30-day trial

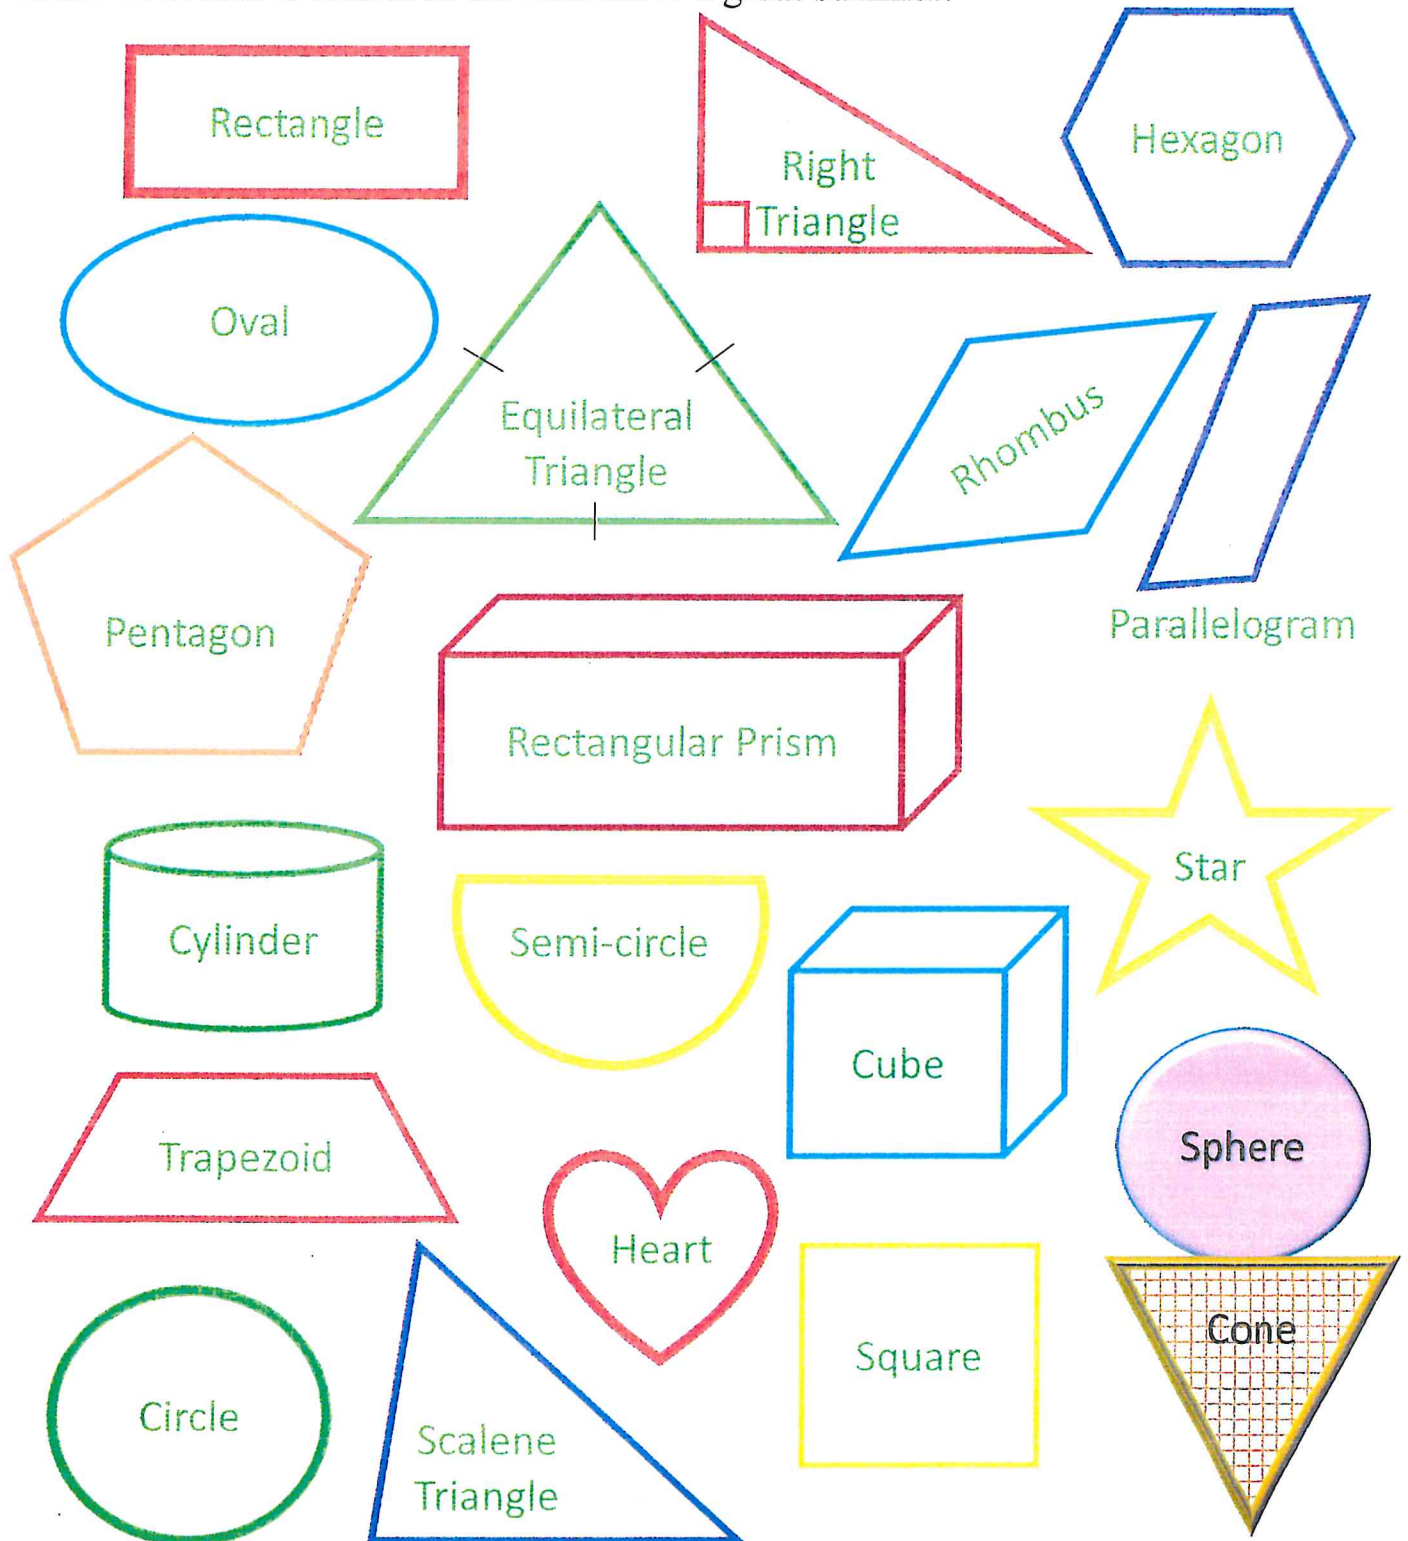

Intentionally incorporating math into daily activities will promote student success in the new school year. Have a wonderful summer!

St. Rita School Summer Math Practice Tracker

Student Name: _____

Rising to Grade: _____

Parents, when your child completes 15-20 minutes of any math activity (ideas are listed on the reverse), initial and date a shape. Work to complete all 20 shapes, ending with the sphere and cone. Students will turn in the fully completed sheet for a treat when we return to school in the fall. Have a great summer!

Word Problems

- 1) At an amusement park, Joan wants to ride a rollercoaster that costs 30 tickets, a bumper car that costs 15 tickets, and a merry-go-round that costs 19 tickets. Joan had 25 tickets, but lost 6 of them on a ride. How many more tickets does she need? _____
- 2) Joan wants 108 cupcakes for her party. Joan has already made 48 vanilla cupcakes, and 24 fudge cupcakes. How many more cupcakes does Joan need to make? _____
- 3) Joan made 3 different stacks of wooden blocks. The first stack was 5 blocks high, the second stack was 8 block(s) higher than the first, and the final stack was 5 block(s) higher than the second. In total, how many blocks did Joan use for all 3 stacks? _____
- 4) For soccer season, Nancy decided to buy a ball for \$8.90, new shorts for \$29.20, as well as a pair of soccer shoes for \$45.90. Nancy currently has \$22.20, and a coupon for \$14.00 off her purchase. How much more money does Nancy need to complete her purchase? _____
- 5) Before getting to school, Joan has a few errands to run. Joan has to walk 11 blocks to the store, and 10 blocks to the museum, before walking the final 4 blocks to arrive at school. If Joan has already walked 12 blocks, how many more blocks must she walk before arriving at school? _____
- 6) John wanted to save money to buy a new outfit. John saved \$23.60 in June, \$21.50 in July and \$25.70 in August. However, he also had to spend \$21.80 on school supplies and \$47.10 on his dog. If the outfit costs \$185.70, how much money does John still need to save? _____
- 7) Benny wants several different color plates for his birthday. Benny wants to get 96 silver plates, 84 gold plates, and some amount of orange plates. In total, Benny wants 324 plates, so how many orange plates should he get? _____
- 8) Sara likes to collect coins. Sara got 38 coins from her brother, 21 coins from her mother, as well as 24 coins from Mike. However, Sara lost 29 coins before putting those coins into her piggybank. How many coins does Sara have in her piggybank? _____
- 9) For lunch, Peter bought a glass of juice for \$1.70, a reuben sandwich for \$5.30, as well as some cookies for \$3.20. The tax came out to \$1.80, and Peter paid with \$19.00. How much change should Peter receive? _____
- 10) Mike had 183 lynx stickers. Mike gave 73 stickers to Jason, 44 stickers to his sister and an additional 41 stickers to John. How many stickers does Mike still have? _____
